

GÖKÇE GÜLER

Full-Stack Software Engineer

gokcenizguler@gmail.com | +90 542 588 9804 | [linkedin.com/in/gokceguler/](https://www.linkedin.com/in/gokceguler/) | Istanbul, Türkiye

PROFESSIONAL SUMMARY

- **Founding-stage engineer at Everion Consulting** — involved from early company formation through hands-on **software architecture, product development, production infrastructure, application security, and technical leadership**.
- Built and shipped features across **8+ SaaS products** in automotive, insurance, legal, HR, CRM, and **AI-powered document processing** domains.
- Core stack: **Python, Django REST Framework, PostgreSQL, React, React Native, Docker**. Hands-on with **DevOps, CI/CD, server management, and security hardening**.

WORK EXPERIENCE

EVERION CONSULTING

Istanbul, Türkiye

Founding Engineer & Technical Lead

April 2026 – Present

- Promoted into a company-wide **technical leadership** role after contributing from Everion's early formation stage; owned **technical architecture, production readiness, and cross-product engineering priorities**.
- Coordinated a **team of 12 engineers** while remaining hands-on across **backend, frontend/mobile, DevOps, testing, security, and production releases**.
- Led **infrastructure and security operations** — including a fleet-wide SSH audit across ~15 VMs, production server management, and Docker-based deployment pipelines.

Full-Stack & Solution Engineer

March 2025 – April 2026

- Built and shipped features across **8+ SaaS products** (automotive, insurance, legal, HR, CRM, AI) from requirement analysis through **production deployment**.
- Developed **REST APIs, background tasks, and business workflows** using Python, Django REST Framework, PostgreSQL, Redis, and Celery.
- Contributed to **React and React Native** development; managed sprint planning, testing, and customer feedback loops.

Software Engineer

EKŞİOĞLU HUKUK | Istanbul, Türkiye | December 2024 – March 2025

- Developed **backend and frontend features** for internal legal software covering case management, insurance/arbitration filings, collections, and field operations.
- Built **dashboards, reporting screens, and Excel/PDF export** functionality using React and Django.
- Digitized **manual operational workflows** into trackable, reportable systems for legal and field teams.

Business Analyst Intern

SKYLAND A.Ş. | Istanbul, Türkiye | September 2023 – February 2024

- Prepared **business analysis documents, user scenarios, and process flows**.
- Contributed to **requirement analysis and project documentation** processes.

Software Engineering Intern

ZİRAAT TEKNOLOJİ | Istanbul, Türkiye | July 2023 – September 2023

- Worked within the **Card Systems team** on enterprise software development.
- Developed features using **ASP.NET, C#, Entity Framework, and MSSQL**.

EDUCATION

BAHÇEŞEHİR ÜNİVERSİTESİ

B.Sc. in Software Engineering (English-taught) | Istanbul, Türkiye | 2024

- **100% Scholarship**

CERTIFICATIONS

- **Salesforce Certified Administrator** — User, security, automation, and CRM management on Salesforce platform.
- **Salesforce Agentforce Specialist** — Design and management of AI-powered Agentforce solutions.
- **IBM Data Analyst Professional Certificate** — Data analysis, visualization, SQL, and business intelligence.
- **Miuul Data Scientist Path** — Machine learning, recommendation systems, CRM analytics, and feature engineering.

SELECTED PROJECTS

Galerion — SaaS-based dealership and operations management platform for the automotive industry.

Technologies: Django, DRF, PostgreSQL, PostGIS, Redis, Celery, React, Docker

- Served as the **primary engineer** for Galerion, owning core backend architecture and implementation across key product modules.
- Designed and built a **multi-tenant architecture with role-based access control** using Django REST Framework, PostgreSQL/PostGIS, Redis, and Celery.
- Developed vehicle management, CRM, document, expense, reporting, and dealer-network modules; also drove **product scope and technical prioritization**.

HasarLink — Operations management platform for auto damage repair specialists and service centers.

Technologies: Django, DRF, PostgreSQL, React, Vite, Firebase/Web Push, Docker

- Served as the **primary engineer** and led the platform migration from DigitalOcean to a dedicated VM, designing a **Docker Compose architecture spanning 11 containers** (Django ASGI, Celery workers, Redis, PostgreSQL, Nginx with WebSocket support).
- Built end-to-end **damage case workflows** — file creation, document upload, tracking, notifications, payments, and depreciation calculations.
- Developed **dashboards, approval/revision flows, and web push notifications** for multiple user roles (service, expert, field team, manager).

QRakter — Mobile/web platform for accident-time assistance, digital reporting, QR-based vehicle and document management.

Technologies: Django, DRF, PostgreSQL, Redis, Celery, React Native, Expo

- Contributed across **accident reporting, vehicle, insurance, document, signature, QR, and fleet modules** on the mobile and backend stack.
- Implemented **GPS check-in/check-out, offline sync, and real-time location tracking** across mobile and backend.
- Handled **KVKK compliance, security assessments** — OTP, CORS, token management, and sensitive data flows.

Doc AI — AI-powered document processing system that automates form filling across company products by extracting structured data from uploaded documents.

Technologies: Django, DRF, Celery, Redis, Google Gemini API, PostgreSQL

- **Independently designed and built Doc AI end-to-end**, including document ingestion, classification, multi-file analysis, structured JSON outputs, error handling, and production integration.
- Integrated **Google Gemini API** to extract structured data from vehicle registrations, IDs, accident reports, insurance policies, invoices, and business cards.
- Integrated the system into HasarLink and QRakter to enable **automatic form filling from uploaded documents** and significantly reduce manual data entry.

Notification Kit — Open-source notification management library for Django projects.

Technologies: Python, Django, PyPI

- Identified **repeated notification infrastructure setup** across company projects and abstracted it into a **reusable, modular library**.
- Supports **SMS, email, and push notifications** with multi-provider architecture and extensible design.
- **Published on PyPI** — actively used across multiple production projects.

Tazminat Makinesi — Independent actuarial compensation calculation engine for Turkish traffic and workplace accident claims.

Technologies: Python, Django

- **Independently designed and built the product end-to-end**, including backend architecture, actuarial data modeling, deployment, and **technical SEO and Generative Engine Optimization (GEO)** setup.
- Reconstructed and validated **actuarial calculation logic** using reference outputs, life tables, and domain-specific compensation rules.
- Implemented **injury and fatal-accident calculation modules** using TRH-2010 and PMF-1931 life tables, minimum wage history, and the 2-2-1-1 support-share model.

SKILLS

- **Backend:** Python, Django, Django REST Framework, REST API Development, Celery, C#, ASP.NET, Entity Framework
- **Frontend & Mobile:** React, React Native, Next.js, JavaScript, TypeScript, Expo
- **Database & Cache:** PostgreSQL, PostGIS, Redis, MSSQL
- **DevOps & Infrastructure:** Docker & Docker Compose, Nginx, CI/CD, GitHub Actions, Linux (Ubuntu), SSH Hardening, Server Management, Production Deployment
- **Cloud & Services:** DigitalOcean, AWS S3, Firebase, Google Gemini API, iyzico
- **Product:** Product Management, Requirement Analysis, Customer Communication, Team Coordination, Sprint Planning, Agile
- **Languages:** Turkish (Native), English (Professional working proficiency)
